

ABOUT US

The company HSTEC specializes in development, design and production of high speed motorized spindles, direct drives and other high speed technology, as well as for engineering, design and automation of special machine tools and systems.

The company foundation in the year 1997 was conducted in cooperation with the company SAS Zadar, well-known in the field of production of special machine tools and the German company Bosch-Rexroth (formerly INDRAMAT), a world famous company in the production of electric drives and control systems.

Since founding HSTEC has developed a wide range of motorized spindles and electric drives for direct application in machining centers and machine tools. Our flexible team of highly skilled mechanical and electrical engineers with

great working experience in development, design and production of special machine tools and implementation of industrial robots offers creative solutions in industrial automation.

HSTEC's R&D team is focused on individualized production offering development, design, calculations and optimization, production and assembly of machine tool components according to customer request.

High standard of product quality control continues after the implementation of the product at the customer, thus managing the product's lifecycle.

HSTEC represents world renowned companies in the field of automation for the Croatian market:

- Balluff - electronic and electromechanical sensors, rotary and linear transducers
- Rexroth Bosch - servomotors, drives and control
- Alpha Getriebe – planetary gear heads, electromechanical drive systems
- Mitutoyo – measurement devices
