

SPINDLE SERVICE AND REPAIRS

As a result of years of experience and top-quality equipment, HSTEC offers testing, repairs and maintenance of spindles (main spindle drives, direct drive motors, motorized spindles and other machine tool components) of all renowned manufacturers.

Within the HSTEC manufacturing facility there is the assembly department and various test benches for testing and optimization of electromechanical components such as motorized spindles.

Repairs and final testing of spindles and components are performed according to strict quality control standards.
