Innovative motorized spindles

Transform your production process and increase productivity by implementing the new and improved SMART spindle, engineered to communicate with the machine and predict its maintenance. Our high-precision CNC machines, the latest technologies, and superb quality control are crucial for the development and manufacturing of high-quality products that fit Industry 4.0 standards.

We offer standard and special design solutions for motorized spindles.

According to your needs, we can specify:

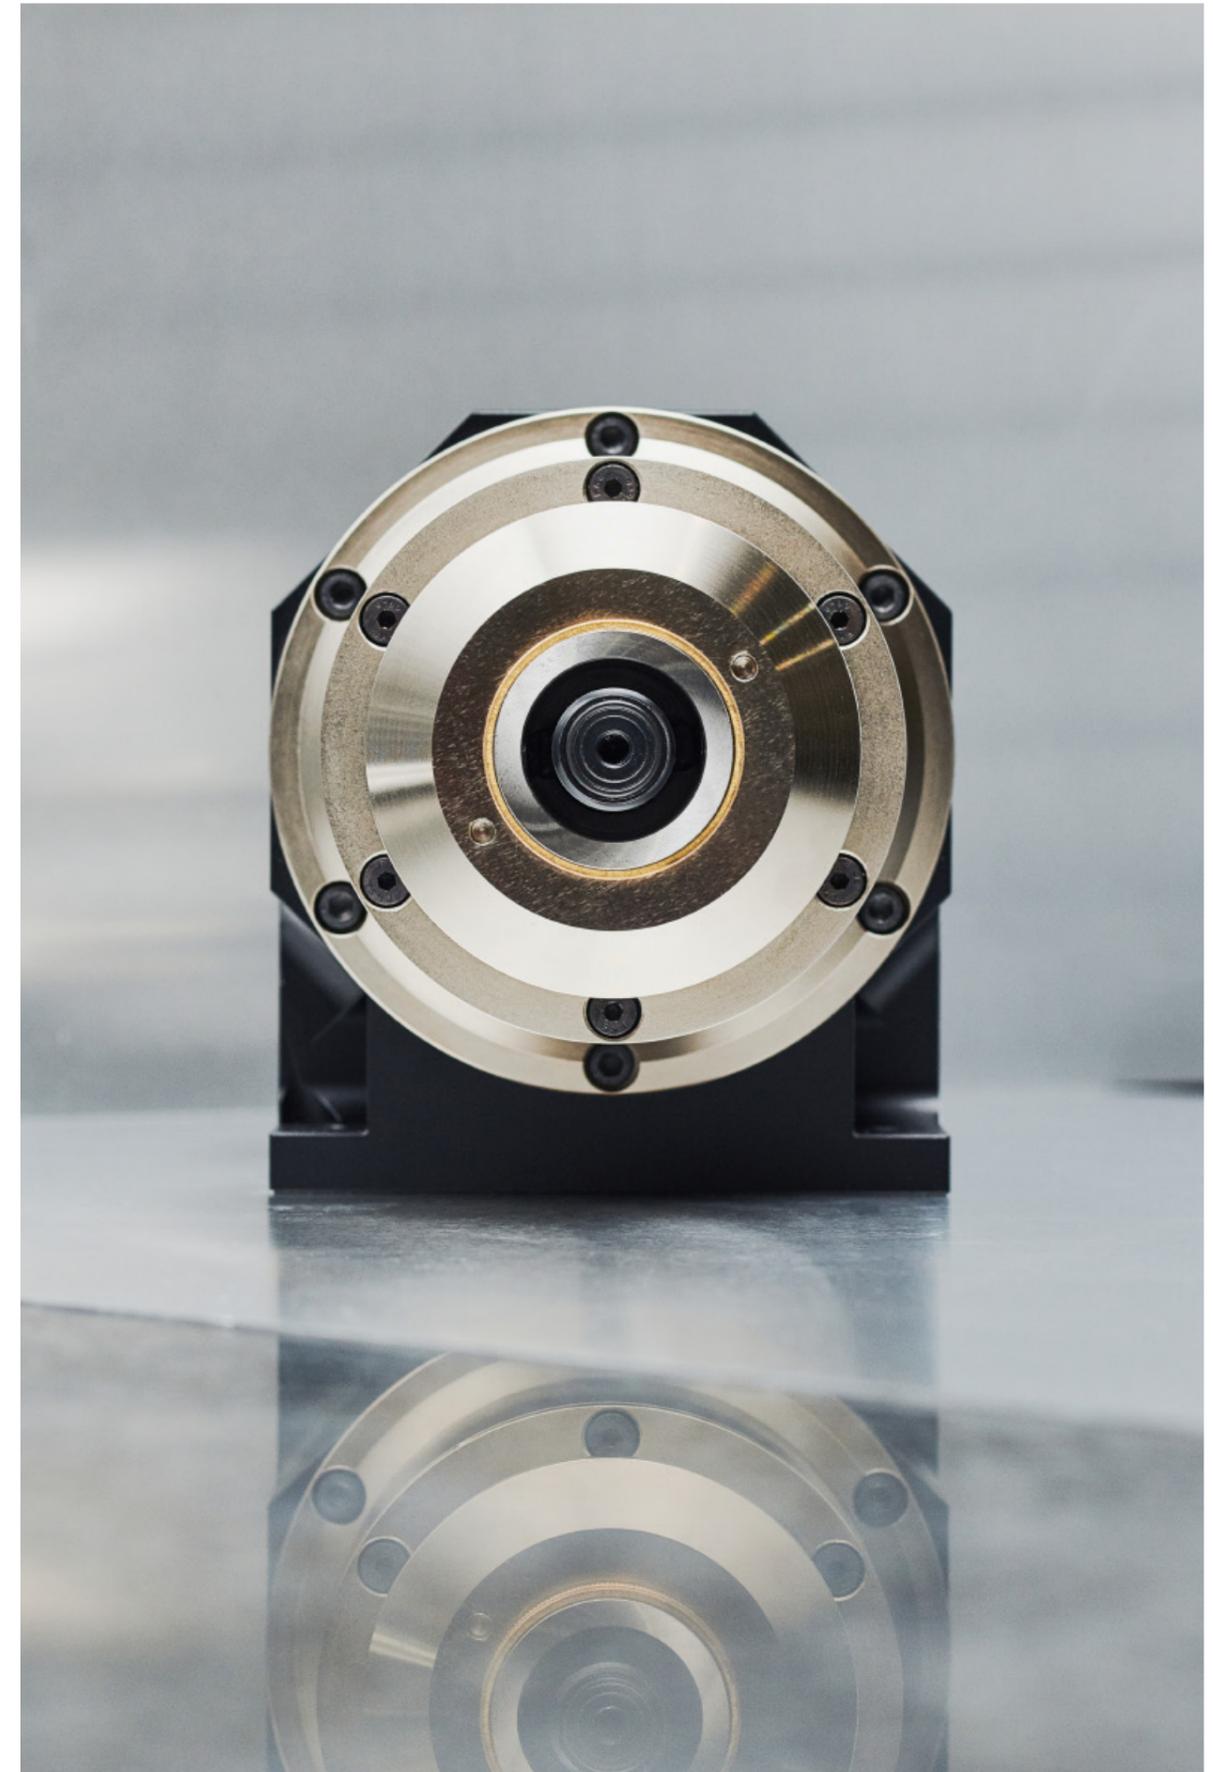

Spindle dimensions
Spindle torque
Motor speed
Tool clamping
Tool interface
Bearing
Lubrication type
Position sensor type

Inovativna motorvretena

Preoblikujte svoj proizvodni proces i povećajte produktivnost uvođenjem novog i unaprijeđenog SMART vretena, izrađenog da komunicira sa strojem i predviđa njegovo održavanje. Naši visokoprecizni CNC proizvodni strojevi, najnovije tehnologije te vrhunska kontrola kvalitete od presudne su važnosti za razvoj i proizvodnju visokokvalitetnih proizvoda koji odgovaraju standardima Industrije 4.0.

Nudimo standardna i posebno dizajnirana rješenja za motorvretena. Ovisno o vašim potrebama, možemo prilagoditi:

Dimenzije vretena
Moment sile vretena
Brzinu motora
Stezanje alat
Prihvat alata
Uležištenje
Vrstu podmazivanja
Tip senzora pozicije i brzine

High precision spindles for internal and external cylindrical grinding.

Low vibration amplitudes of HSTec spindles during the grinding process ensure excellent surface quality of the machined workpiece. Additionally, we offer dressing spindles designed for dressing and profiling of grinding wheels.

Options and functionalities:

Rated power outputs from 1,5 kW to 150 kW

Rotational speed up to 90000 rpm

Manual or automatic tool clamping systems

Tool interface: HSK, Grinding Arbor, customized solutions

Hybrid or steel spindle bearings

Bearing lubrication: grease or oil-air lubrication

High-resolution speed and position sensor, incremental or absolute encoder

Data Logger - Predictive maintenance with data acquisition and monitoring system

Active balancing system

Acoustic emission sensors

Adaptive bearing preload

Compensation of the spindle axial expansion

Compatibility with all control devices and CNC machine programs

Mounting dimensions and drive specifications according to customer request

Visokoprecizna motorvretena za unutarnje i vanjsko cilindrično brušenje.

Niske vibracijske amplitude HSTec vretena tijekom obrade brušenjem osiguravaju izvrsnu kvalitetu strojno obrađene površine. Dodatno, u ponudi imamo i vretena za brusne strojeve dizajnirana za skidanje srha i profiliranje brusnih ploča.

Opcije i funkcionalnosti:

Nazivna izlazna snaga od 1,5 kW do 150 kW

Brzina vrtnje do 90 000 o/min

Ručni ili automatski sustavi stezanja alata

Prihvat alata: HSK, Grinding Arbor, prilagođena rješenja

Keramička ili čelična uležištenja vretena

Podmazivanje ležajeva: mast ili podmazivanje mješavinom ulje-zrak

Senzor brzine i položaja visoke rezolucije, inkrementalni ili apsolutni enkoder

Data Logger – prediktivno održavanje sa sustavom za prikupljanje i nadzor podataka

Sustav za automatsko balansiranje

Acoustic emission senzor

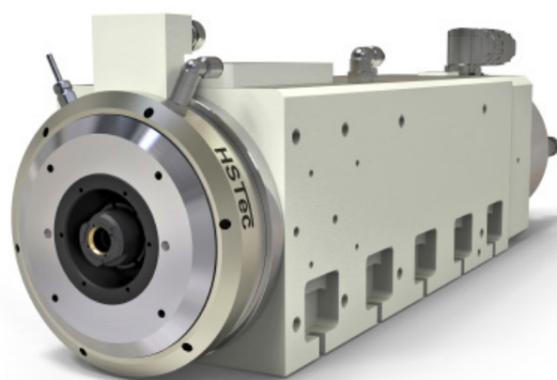

Adaptivno predopterećenje ležajeva

Kompenzacija aksijalne ekspanzije vretena

Kompatibilnost sa svim upravljačkim uređajima i programima CNC strojeva

Montažne dimenzije i specifikacije motora u skladu sa zahtjevom kupca

High-performance spindles for a variety of milling and boring applications.
Robust and reliable for high load capabilities. Designed for high efficiency CNC machine tools machining. Applicable for high speed cutting applications.
Options and functionalities:

Rated power outputs up to 80 kW

Rotational speed up to 28000 rpm

Automatic tool clamping system and clamping status monitoring

Hydraulic, pneumatic or electric release unit and rotary union up to 150 bar

Tool interface: HSK, PSC (Capto), SK, BT, CAT, customized solutions

Hybrid or steel spindle bearings

Bearing lubrication: grease or oil-air lubrication

Data Logger - Predictive maintenance with data acquisition and monitoring system

Active balancing system

Compensation of the spindle axial expansion

Compatibility with all control devices and CNC machine programs

Mounting dimensions and drive specifications according to customer request

Visokoučinkovita motorvretena za razne primjene u području obrade glodanjem i bušenjem.
Robusna i pouzdana u slučajevima velikih opterećenja. Dizajnirana da bi omogućila visokoučinkovitu obradu CNC alatnim strojevima. Primjenjiva za strojne obrade velikim brzinama.
Opcije i funkcionalnosti:

Nazivna izlazna snaga do 80 kW

Brzina vrtnje do 28 000 o/min

Automatski sustav stezanja alata i nadzor statusa stezanja

Hidraulična, pneumatska ili električna jedinica za otpuštanje alata i rotacijske glave do 150 bara

Prihvati alata: HSK, PSC (Capto), SK, BT, CAT, prilagođena rješenja

Keramička ili čelična uležištenja vretena

Podmazivanje ležajeva: mast ili podmazivanje mješavinom ulje-zrak

Lightweight spindles and custom design suitable for mounting on industrial robots.

Custom made for various operations, such as balance and force test stands, turret heads. Mounting dimensions and drive specifications according to customer request.

Lagana vretena i prilagođen dizajn prikladan za montažu na industrijske robote. Izrađena po narudžbi za različite namjene, poput ispitnih uređaja za balansiranje i testiranje sile, revolver glave. Montažne dimenzije i specifikacije motornog pogona prema zahtjevima kupca.

High torque spindles designed for turning applications.

Custom made special purpose spindles for demanding turning operations.
Powerful B-axis milling spindles for CNC lathe machines.

Options and functionalities:

Maximum torque outputs up to 500 Nm

Rotational speed up to 10000 rpm

Automatic tool clamping system and clamping status monitoring

Workpiece clamping with a variety of different chucks

Hybrid or steel spindle bearings

Bearing lubrication: grease or oil-air lubrication

High-resolution speed and position sensor, incremental or absolute encoder

Data Logger - Predictive maintenance with data acquisition and monitoring system

Compatibility with all control devices and CNC machine programs

Mounting dimensions and drive specifications according to customer request

Vretna visokog okretnog momenta dizajnirana za tokarske strojeve.

Prilagođena vretena posebne namjene za zahtjevne postupke tokarenja. Snažna glodača motorvretena za B-os stroja za primjenu u CNC tokarskim strojevima.

Opcije i funkcionalnosti:

Maksimalni okretni moment do 500 Nm

Brzina vrtnje do 10 000 o/min

Automatski sustav stezanja alata i nadzor statusa stezanja

Stezanje obratka različitim tipovima steznih glava

Keramička ili čelična uležištenja vretena

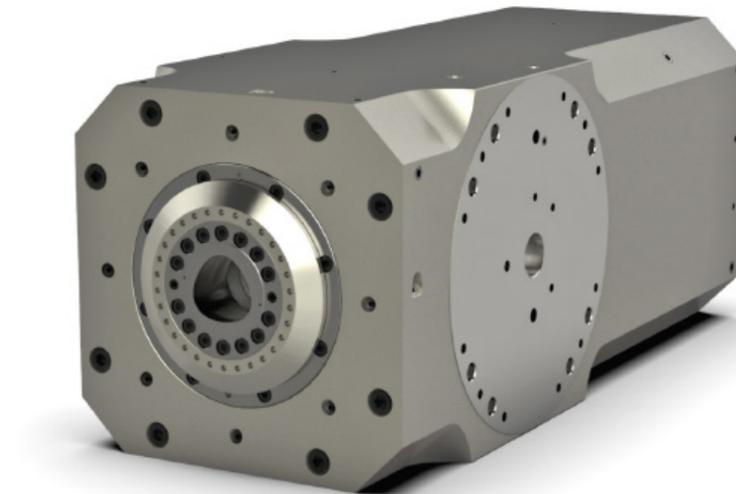

Podmazivanje ležajeva: mast ili podmazivanje mješavinom ulje-zrak

Senzor brzine i položaja visoke rezolucije, inkrementalni ili apsolutni enkoder

Data Logger – prediktivno održavanje sa sustavom za prikupljanje i nadzor podataka

Kompatibilnost sa svim upravljačkim uređajima i programima CNC strojeva

Montažne dimenzije i specifikacije motora u skladu sa zahtjevom kupca

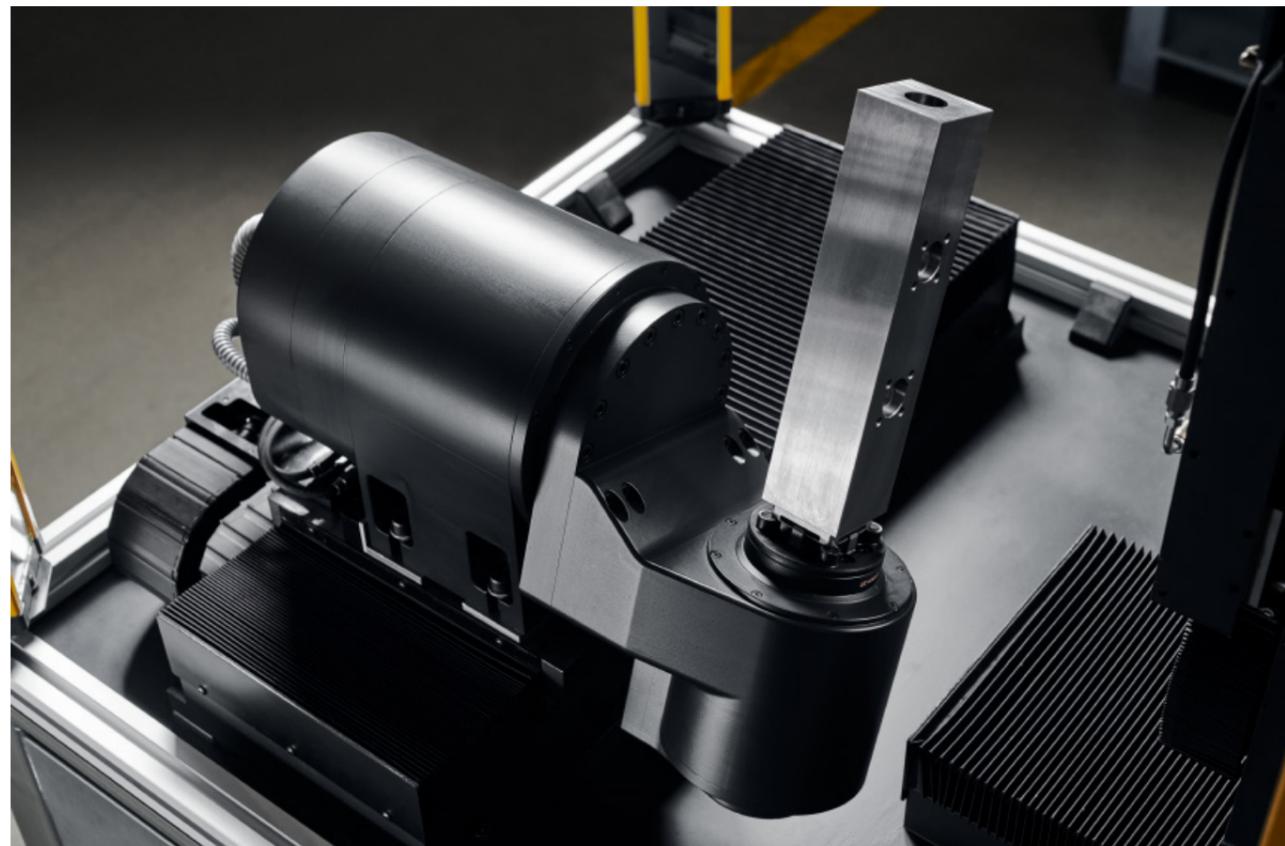

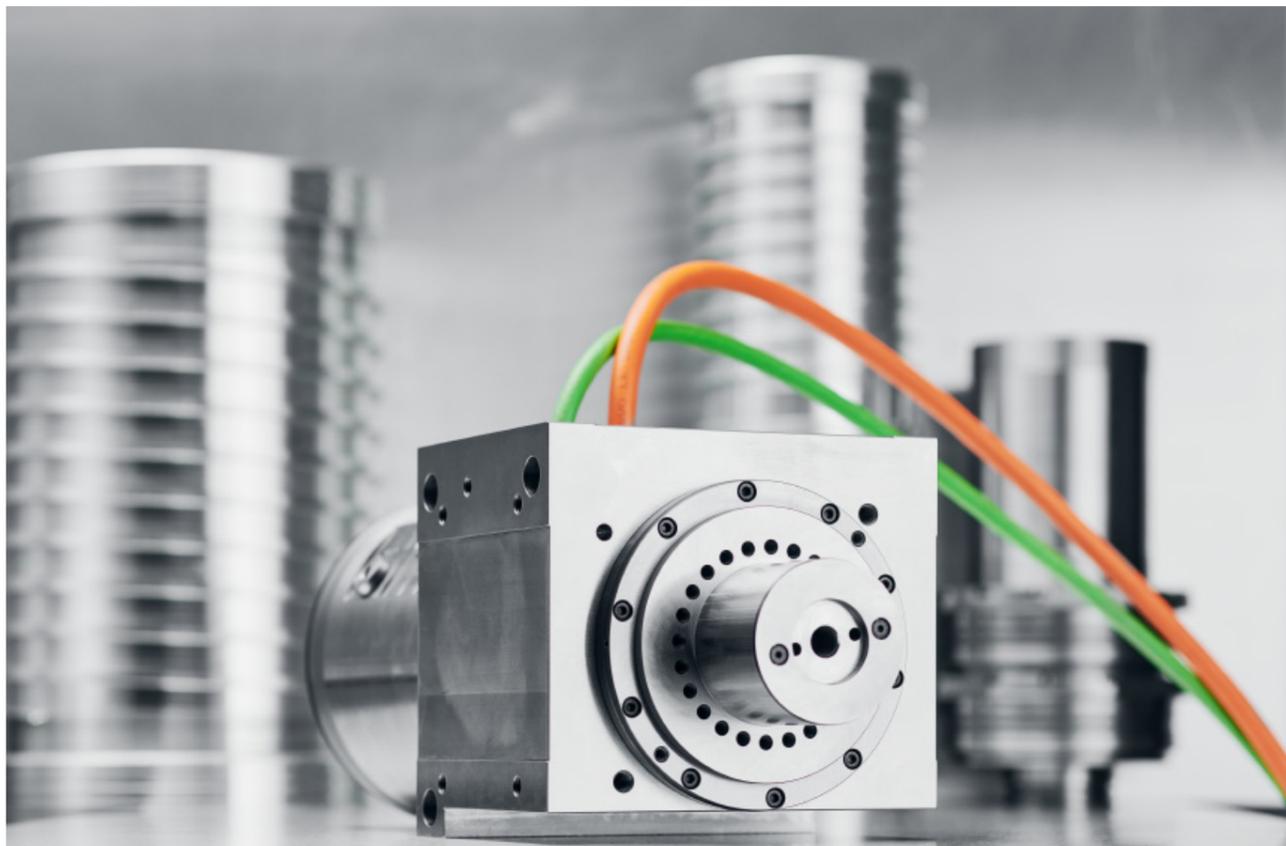

Designed for top performance and custom made for special applications.

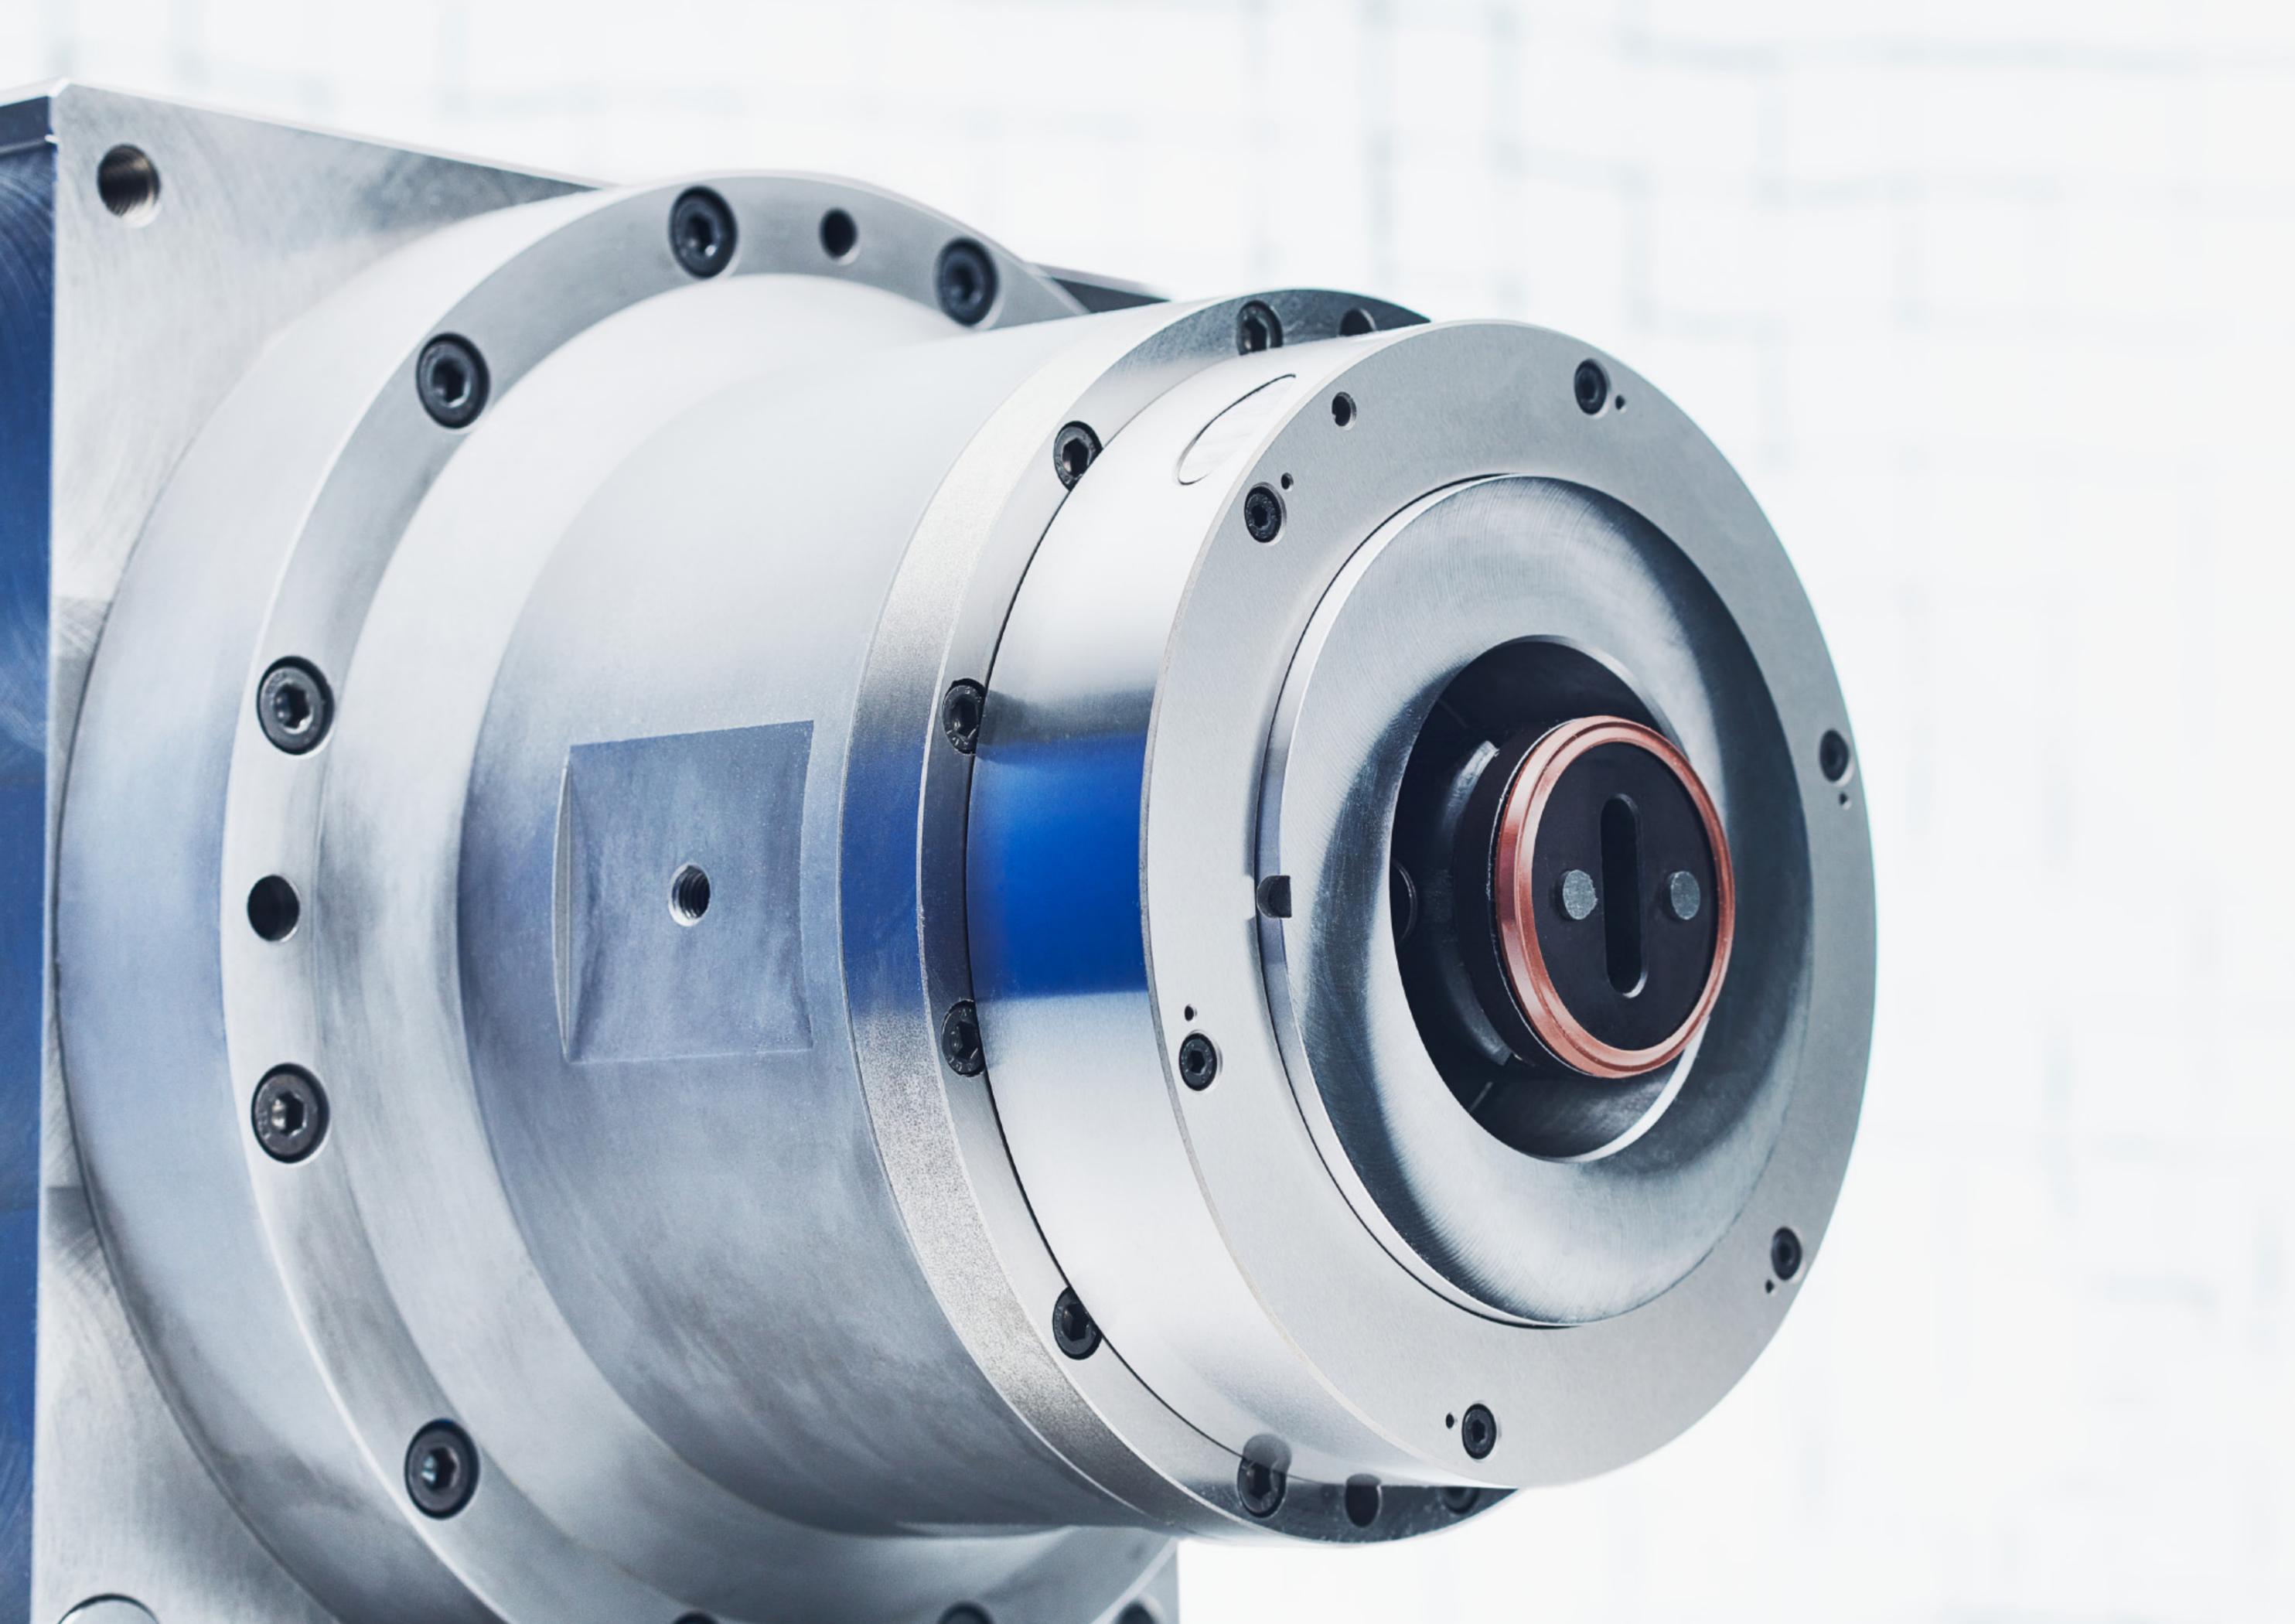

Customized motors for demanding applications. Two-axis milling heads.

Linear drive units. One and two axis rotary tables. Direct drive high torque motors with absolute measuring encoder system.

Dizajnirani za vrhunske performanse i prilagođeni za posebne primjene.
Motori prilagođeni zahtjevnim namjenama. Dvoosne glodače glave. Linearne pogonske jedinice. Jednoosni i dvoosni rotacijski stolovi. Direktni pogonski motori s velikim okretnim momentom sa apsolutnim mjernim enkoderom.
